wellbian

Every room is data. Every call is revenue.

Each new room adds verified air data to sell. Manufacturers, AI agents and smart homes pay for every call in RLUSD, a dollar stablecoin, settled on the XRP Ledger.

SUPPLY

Devices earn for verified data.

Air sensor

PM · CO_2 · TVOC · temperature · humidity

Outdoor line next: PM · O_3 · NO_2 · SO_2 · CO

Device wallet

Holds the device's license NFT

One device, one NFT

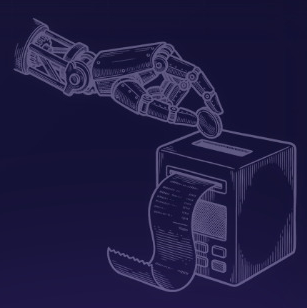

Oracle

License → quality → reward

Settled daily, claimable after 24 hours

DEMAND

Buyers pay per call.

Makers · AI agents · smart homes

Pay automatically, call by call

In RLUSD, a USD stablecoin

x402 gateway

402 → pay → verify on-chain → 200

No invoices, no human in the loop

Data products

Aggregates · cohorts · AI reports

De-identified behind a k-anonymity gate. Cohorts and reports next

rewards | payments

Operations wallet pays rewards · receives payments · runs burns

XRP Ledger Where both loops settle.

License NFT XLS-20
Minted by the operations wallet

WLBN · RLUSD Issued assets
Held on trust lines

AMM XLS-30
WLBN ↔ RLUSD swaps

Issuer (cold) Issuance
Burned tokens return here

Simplified from the wellbian DePIN technical specification v0.3 ·
Rewards are fixed quantities; no value is promised.
