wellbian

WELLBIAN AI · AI FACTORY

Same data. Sold twice.

First as verified data, by the call. Then as intelligence: our AI factory refines the same readings, with 30 years of KWeather observation and forecast data, into indexes, forecasts and agents.

INPUT

Weather big data

Sensors in real rooms
PM · CO_2 · TVOC · temperature · humidity

30 years of KWeather data
Observation and forecast archive

City weather
172 cities · a consensus of eleven weather feeds

↓

REFINE

The AI factory

1 **Collect** raw data from every source

2 **Clean** drop bad and missing readings

3 **Structure** shape it for the models

4 **Generate** indexes, forecasts, answers

Weather AI models

B300 GPU inference

↓

OUTPUT

Weather intelligence

60-day hyper-local forecast agent
A decision for your plans · evidence on request

Inference API
Indexes, forecasts, risk indexes

Industry packages
Energy · construction · retail · public sector

Revenue data by the call · agent plans after launch · inference API · industry packages

“Intelligence tokens” is AI-factory language for model output. They are not WLBN.

From the Wellbian Labs whitepaper v1.0 draft (2026-09-28) and wellbianai.io · No price or return is promised.
